- MySQL
- MongoDB
- SQLite

Tools & DevOps

- Git/GitHub
- Docker
- Vercel
- Render
- Postman
- Swagger

LANGUAGES

- Arabic
- Native
- English
- Professional

WHAT I OFFER

Full-stack web apps

End-to-end builds — schema, API, and interface for products that need real data behind them.

Admin dashboards

Internal tools for tracking and managing business data in one place.

Bilingual corporate sites

Professional EN/AR sites with full RTL support.

PROFILE

Third-year Computer Science and Artificial Intelligence student at Helwan University with hands-on, full-stack ownership of production web products — from database schema to user interface. Experience comes primarily from independent and freelance projects: admin dashboards, bilingual corporate sites, and web utilities, chosen per project rather than a single favorite stack. Comfortable across React/Next.js on the frontend and Django/FastAPI/Node.js on the backend, with SQL and NoSQL databases.

EDUCATION

B.Sc. Computer Science & Artificial Intelligence 2023 – Present
Helwan University, Cairo, Egypt — 3rd Year

PROJECTS

AqarTech — Property Management Dashboard [aqar-tech.vercel.app ↗](#)

Admin dashboard for managing property units, tenants, and rental contracts, with SQL-transaction-backed data integrity and lease-expiry alerts.

- Next.js
- Tailwind
- Express
- PostgreSQL / MySQL

ZEYOTI — Bilingual Corporate Site [zeyoti.vercel.app ↗](#)

Bilingual (EN/AR) corporate site for an automotive distributor, built with full RTL support and a downloadable resource center.

- Next.js
- Tailwind
- Django
- FastAPI

Paylio — Full-Stack Payment System [GitHub ↗](#)

Full-stack payment platform built on Django with a user dashboard for fund management, secure authentication, and a back-office admin interface for complete operational control.

- Django
- FastAPI
- JavaScript

Prayer Now [prayer-now-puce.vercel.app ↗](#)

Prayer-times application with live countdowns and location-based API integration.

- JavaScript
- API Integration

Naharco International — Corporate Site [GitHub Pages ↗](#)

Bilingual company site covering services, blog, and contact management, built collaboratively from the ground up.

- HTML
- CSS
- JavaScript
