PROFESSIONAL SUMMARY

Full-stack developer and third-year Computer Science and Artificial Intelligence student at Helwan University, with 1–3 years of hands-on experience building and deploying web applications through freelance and independent projects. Builds end-to-end products from database schema and REST API to user interface, including admin dashboards, bilingual (English/Arabic, RTL) corporate websites, and payment systems. Skilled in React, Next.js, TypeScript, Node.js, Express, Django, FastAPI, PostgreSQL, and MySQL.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Material UI, Vite

Backend: Node.js, Express, Django, Django REST Framework, FastAPI, REST APIs

AI & Systems: AI Integration, AI Agent Integration, RAG System Design

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Tools & DevOps: Git, GitHub, Docker, Vercel, Render, Postman, Swagger

PROJECTS

REC Company | Property Management Dashboard | properties-company-system-frontend (Vercel)

Built a full-stack admin dashboard for managing property units, tenants, and rental contracts.
Ensured data integrity using SQL transactions and implemented lease-expiry alerts.
Integrated an AI agent into the system.

Technologies: Next.js, Tailwind CSS, Express, PostgreSQL

ZEYOTI | Bilingual Corporate Website | zeyoti.vercel.app

Developed a bilingual (English/Arabic) corporate website for an automotive distributor with full RTL support.
Implemented a downloadable resource center and a Django-based backend API.

Technologies: Next.js, Tailwind CSS, Django, FastAPI

Paylio | Full-Stack Payment System | github.com/adel307/paylo

Built a payment platform with a user dashboard for fund management and secure authentication.
Developed a back-office admin interface for complete operational control.

Technologies: Django, FastAPI, JavaScript

Prayer Now | Prayer Times Web Application | prayer-now-puce.vercel.app

Developed a prayer-times application with live countdowns and location-based API integration.

Technologies: JavaScript, REST API integration

Roadmap Academy | Online Course Platform | roadmap-course-player-page.vercel.app

• Built a responsive course platform for browsing courses, viewing course details, and watching video lessons.

• Integrated YouTube playlists through the YouTube Data API to retrieve course lessons and video details.

• Implemented saved lessons with persistent browser storage, course lists, and lesson search.

• Added light and dark themes using a responsive interface.

Technologies: Next.js 16, React 19, TypeScript, Tailwind CSS 4, Zustand, YouTube Data API

EDUCATION

B.Sc. in Computer Science and Artificial Intelligence

Helwan University, Cairo, Egypt | 2023 – Present (Third Year)
